WORK EXPERIENCE

Full Stack Web and Mobile Developer
Yesil Science | 2020 - 2021
- Creating apps with React and Redux
- Implementing systems with React Native
- Working on multiple projects

EXECUTIVE SUMMARY

I am a full stack developer who loves programming and developing. I enjoy learning new things and improving myself and my aim is to have a job that I can do my favorite hobby in my life.

PROGRAMMING LANGUAGES

- Typescript <3
- Dart <3
- Javascript
- C#
- Python

PROJECTS

R/E-Commerce
My full stack solo e-commerce project.
- Backend - Express, Mongoose, Stripe
- Frontend - React, Redux, Ant Design and Firebase to upload images.

Hobbycorn
- Backend - Express with AWS
- Admin Panel - React with Redux

FluAI
- React Native
  (Redux, Javascript, Localization and Notifications)

Healtius
- React Native
  (Redux, Javascript and Api Connection)

RavenBlog
My full stack solo blog project (with many mistakes).
- Backend - Express, Mongoose
- Frontend - React, Context Api, Materialize, Firebase/Firestore

Other
- I, of course, made more projects and still creating new ones, you can see most of them in my Github profile. I mainly code web but I still have mobile apps and libraries.
- Other than React/React Native projects, I also have Flutter projects, it is very enjoyable to code.

MORE ABOUT ME

- I love learning new stuff.
- I am very interested in technology.
- I enjoy improving myself, really, this is actually the reason of my improving myself that fast, I don't improve myself to gain money, I improve myself to enjoy.
- My interest is not limited with web development, I am also interested in mobile development and software development but I mostly focus on learning one at the same time.

EDUCATION

Mersin University
Bachelor of English Language Teaching | 2017 - Present
- Learning How to Teach and Learn
- Gaining English Skills

Self Education
I have been teaching myself programming for more than a year
